Work Experience:

Software Engineer - Seven years of experience developing high-traffic web APIs for the shipping label industry, eCommerce, and SaaS platforms. I've built scalable, reliable systems using industry-standard frameworks as well as custom MVC architectures. My expertise extends to website development and database design, management, and optimization, as well as Linux system administration and automated Bash scripting.

IOGEAR

10/2023 - 10/2024 ▫ Software Development Contractor ▫ Remote

- IOGEAR sells electronics and software to the government sector, as well as the consumer market.
- Maintain and build features to support new functionality on several APIs and websites.
- Create and manage data pipelines, including exporting product data from web servers to platforms such as Amazon, B&H, Best Buy, etc.

Gori Company

03/2023 - 01/2024 ▫ Software Engineer ▫ Fountain Valley, CA

- Gori operates a B2B shipping label API leveraging contracts with various mail carriers.
- Led the design and development of an in-house manifest mailing system to facilitate USPS shipments without using its shipping API. This system significantly enhanced Gori's operations and improved its cash flow by delivering the functionality to manage the entire label generation life cycle instead of relying on the USPS shipping API.
  - In compliance with extensive USPS guidelines, the new system calculated shipping fees, determined STC codes, generated unique tracking numbers and compliant shipping labels, managed shipments and all CRUD operations in a high-traffic environment with over 300k API requests per day.
- Developed API features, managed data streams and oversaw a team of offshore developers.

Atias Law Group ▫ 10/2022 - 01/2023 ▫ Web Development Contractor ▫ Remote

IOGEAR ▫ 12/2019 - 07/2022 ▫ Full Stack Web Developer ▫ Irvine, CA
